

The highest mobile deicer in the world — The Elephant® Beta-15

The Elephant® Beta-15 is the highest reaching mobile standard deicer. It has all of the excellent characteristics of the regular Elephant® Beta deicer providing firm stability, great product quality, unsurpassed manpower efficiency, fluid saving capability, and overall operational economy.

EXTENDED REACH

A special constructed boom system elevates the operator's eye level to more than 15 m and the nozzle to more than 23 m height, keeping the cabin in front all the way.

The Beta-15 movements are smooth and provide an extremely wide deicing radius, which makes it ideal for remote de-icing with running aircraft engines.

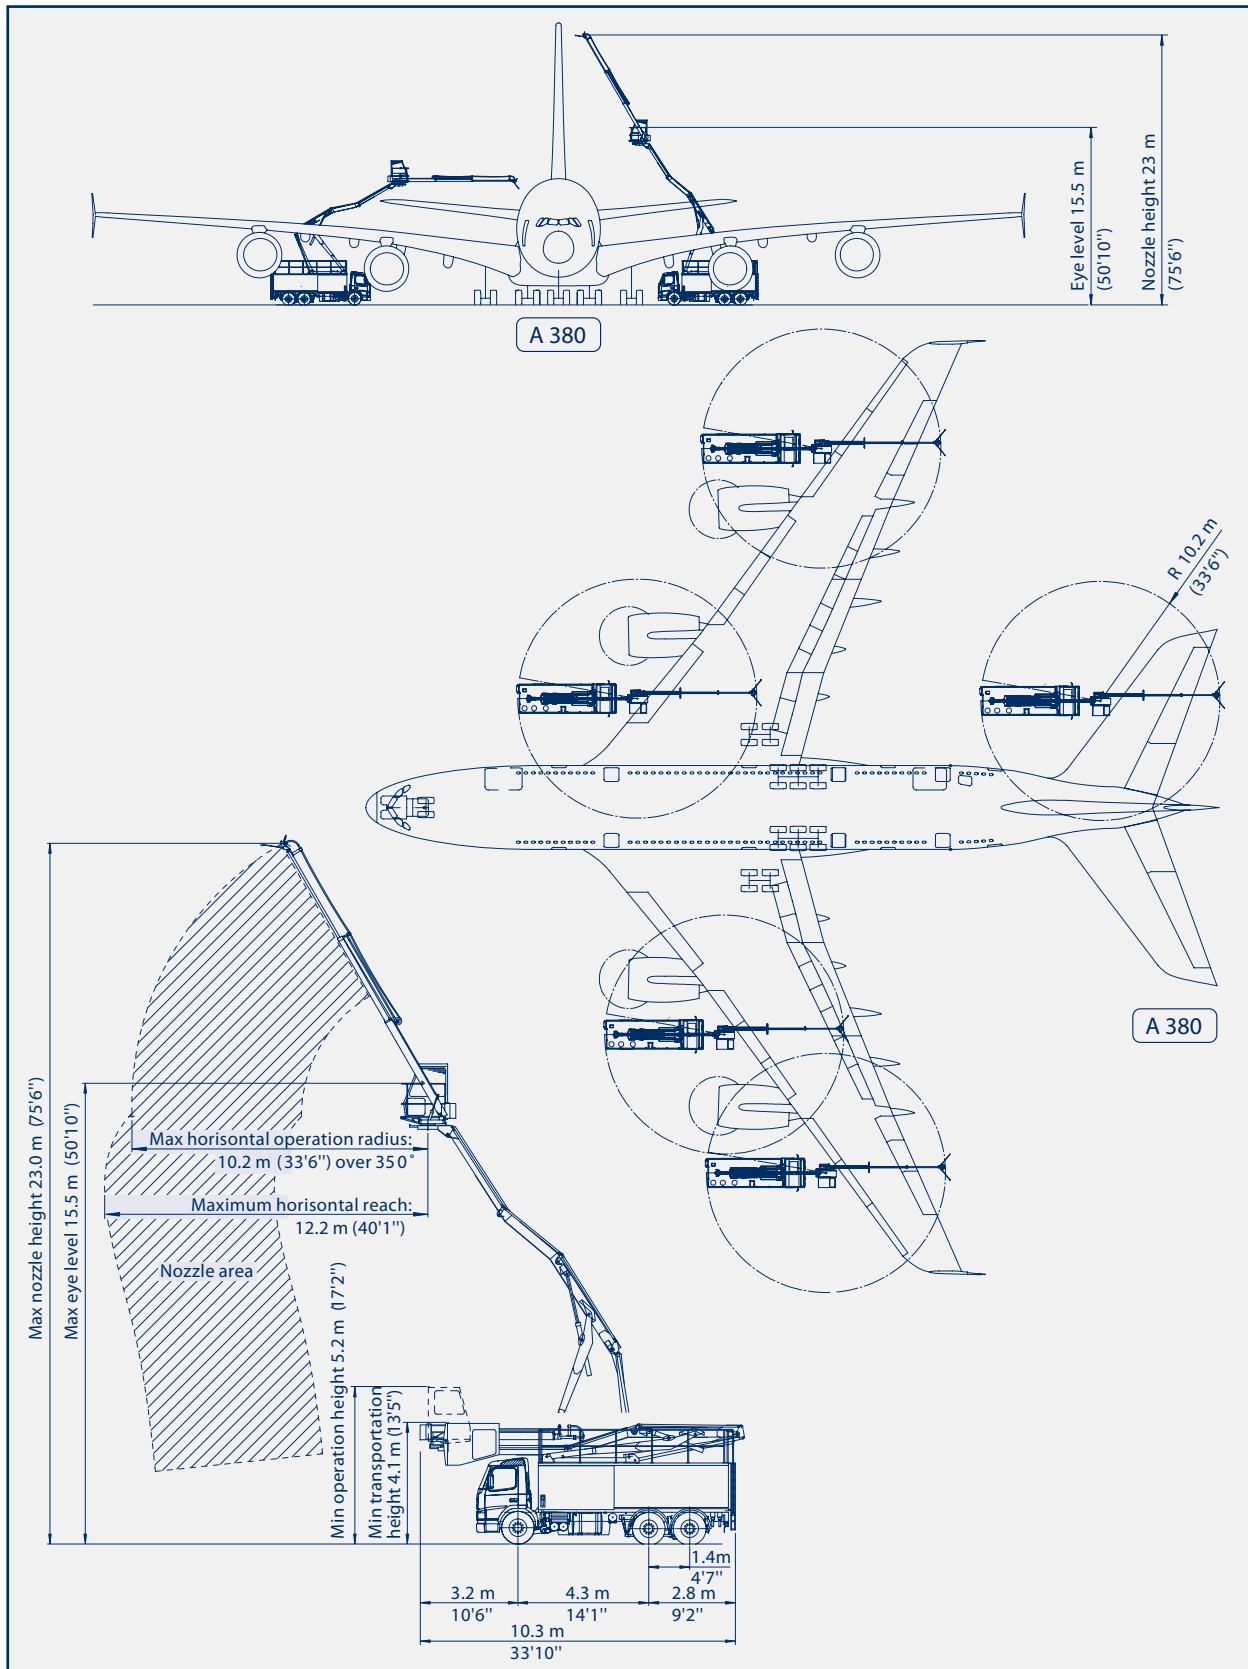

The Beta-15 is available for present and future challenges in modern aviation.

MAJOR ADVANTAGES

- Very high reach
- Large tank capacity
- Inherently stable without needs for any outriggers
- Mobile and swift operation
- All the regular Beta advantages

Specifications

Maximum ground to eye level:	15,5 m / 50'10"	Total tank capacity:	8000 or 11500 litre
Maximum ground to nozzle height:	23 m / 75'6"		2100 or 3000 Gal (US)
Minimum ground to nozzle height:	1,5 m / 4'11"	Two or three tank configuration available.	
Minimum operational height:	5,2 m / 17'2"	Total unit weight (depending on tank size):	30 - 36 tons (metric)
Minimum height (cab folded):	4.1 m / 13'5"	Cabin noise level:	70 dB(a)
Overall width:	2.5 m / 8'2"	Maximum wind speed:	40 kts
Overall length (depending on tank size):	10.3-11.7 m / 33'10" - 38'5"	Maximum ground slope:	3°
